Getting around 4

Licensing agreement 4

The importance of basic machining practice to CNC people 5

Introduction to cutting conditions 8

Spindle speed: Converting from surface feet per minute (sfm) to revolutions per minute (rpm) 8

Spindle speed: Converting from meters per minute (mpm) to revolutions per minute (rpm) 9

Feedrate: Converting inches per tooth (ipt) or inches per revolution (ipr) to inches per minute (ipm) 9

Feedrate: Converting millimeters per tooth (mmpt) or millimeters per revolution (mmpr) to millimeters per minute (mmpm) 10

Getting recommendations for cutting conditions 10

The Internet as a resource 12

Other cutting conditions related to machining 13

Cutting tool materials 13

Cutting tool components 14

Collet holders 15

End mill holders 17

Tap holders 18

Face mill holders 20

Assembling cutting tools 21

Special note inserted cutting tools 22

Hole machining operations 24

Center drilling 25

Cutting conditions for center drilling 26

Programming recommendations 27

Applications for center drilling 27

Dull tool replacement and sharpening 27

Spot drilling 29

Machining Operations Performed On Machining Centers

Cutting conditions for spot drilling 30

Programming recommendations 31

Applications for spot drilling 31

Dull tool replacement and sharpening 31

Counter sinking 32

Cutting conditions for counter sinking 33

Programming recommendations 34

Applications for countersinking 34

Dull tool replacement and sharpening 34

Twist drills 35

Allowing for the Drill Point 36

Calculating the depth of through holes 37

Peck drilling to break chips 37

Peck drilling for deep holes 37

Cutting conditions for twist drills 39

Programming recommendations 39

Applications for drilling with twist drills 39

Dull tool replacement and sharpening 40

Other drilling tools 40

Spade drills 40

Carbide insert drills 41

Dull tool replacement and sharpening 42

Counter boring tools 43

Cutting conditions for counter boring tools 44

Programming recommendations 44

Applications for counter boring 45

Dull tool replacement and sharpening 45

Programming recommendations 68

Reamers 46

Cutting conditions for reamers 46

Programming recommendations 47

Applications for reaming 47

Dull tool replacement and sharpening 47

Boring bars 48

Cutting conditions for boring bars 49

Programming recommendations 49

Applications for boring 50

Dull tool replacement and sharpening 50

Taps 52

The hole before tapping 53

Actions required for tapping 55

Approach position when using a tension/compression holder 56

Cutting conditions for taps 56

Programming recommendations 57

Applications for tapping 58

Dull tool replacement and sharpening 58

Milling operations 59

Milling cutters that can plunge like hole machining tools 60

Climb versus conventional milling 62

Radial and axial depth of cut 63

Rough milling versus finish milling 64

Cutting tool material 65

Cutting conditions for milling operations 67

Types of milling cutters 70

End mills 70

Machining Operations Performed On Machining Centers

Circle milling a counter bored hole 70

Pocket milling 71

Keyway and slot milling 71

Face milling 72

Exterior peripheral milling 72

Face mills 73

Other milling cutters 75

Ball and bull end mills 75

Slotting cutters 77

Dovetail milling cutters 78

Tee slot milling cutters 78

Thread milling cutters 79

Motions needed for thread milling 79

Machining the entire thread in one pass 79

Websites that provide cutting tool information 81

Drilling 81

General information 81

Software 81

Navigating this eBook

While it's pretty easy to get around in this eBook, there are a few tricks you should know about to make things even easier.

Getting around

The table of contents that begins on the first page of this eBook lets you quickly navigate to your topic of interest. Use the back button (just like the back button in your Internet browser) to get back to the table of contents.

Use keyboard controls for Page Up and Page down buttons to move from one page to another. Use Ctrl/Home and Ctrl/End to quickly get to the beginning (table of contents page) or end of the eBook.

You can also use the mouse in conjunction with the page control icons to advance to the end of the eBook, return to the front of the eBook, and turn the page. Use the mouse in conjunction with the view controls to go back to the previous view (just like the back button in your Internet browser) or advance to the next view.

Licensing agreement

By purchasing this eBook, you have the right to place it on your computer. You can also make a backup copy of the eBook file for your own use.

You are not allowed to distribute this eBook in any manner. Doing so is a violation of our copyright.

Think of this eBook as if it is of physical book. You can lend a book to others, but you'll be without the book for the time that you lend it out. If you wish to lend this eBook to someone, it must be removed from your computer. That is, you are only allowed to have one working copy of this eBook. And of course, your registration notice on the cover page will still contain your name.

We hope you enjoy this eBook and find the information contained within to be helpful. Please do not make of distribute illegal copies.
